In this tutorial I show you how to use the Bonsai tools in Cinema 4D to create a Maya Node-based expersion from scratch. After doing this, you can easily transfer this to After Effects CC (or any other compositing software) and render it into video format. You can use this node-based expresion to combine multiple layers, rig hands, heads and whole body compositing (e.g. teeth). As you will see in the video, there are a lot of benefits you have when working in a node-based expression. E-Portfolio in 21st Century Literature . DEM Earth R3 for Cinema 4D R13
